

Business Insurance Solution for Joint Commission Accredited and Certified Firms

One80 Intermediaries/Manchester Specialty is proud to collaborate with The Joint Commission, an independent nonprofit organization whose goal is to drive quality patient health care and safety through standards-setting and accreditation/certification.

- ✓ Manchester Specialty and The Joint Commission are pleased to be working together to raise awareness of the value of accreditation/certification relative to business insurance underwriting and pricing.
- ✓ Program is available on a national basis to all eligible Health Care Firms, with pricing advantages given to Joint Commission accredited/certified firms (where state regulators allow, and based on each individual account).
- ✓ Insurance program includes all the coverage needed to operate, including workers' compensation, professional liability/general liability and "Package" coverage including property, auto/non-owned auto, abuse, crime and cyber liability.
- ✓ Joint Commission accreditation/certification is a positive underwriting attribute, and firms are recognized as quality organizations.
- ✓ Accredited/certified firms can access Manchester Specialty through their own local insurance agent or broker of choice.
- ✓ Insurance premium savings help to offset the cost of accreditation/certification.

You or your local insurance agent/broker can contact the One80 Healthcare Team for more information:
